

THE DURALOK FENCE SYSTEM IS A REAL ALTERNATIVE TO  
TIMBER, STEEL AND OTHER BARRIER TYPE FENCING

**The all new  
Duralok Fence System**  
It's the innovation that's dividing the nation™

The all new Duralok Fence is an innovative fencing system providing an alternative to Timber, Steel, Wire and other fencing in use. The Duralok Fence System is manufactured from a revolutionary PVC formula designed by Australians to stand up against the elements of the harsh Australian climate.

Clearly with its clean and refreshing stunning looks, it is no wonder Australians are now realising the uniqueness of the Duralok Brand of PVC fencing is an affordable alternative to all fencing needs.

**Revolutionary Privacy Fence Design**

**Rural Post and Rail Fence**

Feature	What it provides	Feature	What it provides
<b>Warranty</b>	20 year guarantee without conditions associated with the Duralok product	<b>Warranty</b>	20 year guarantee without conditions associated with the Duralok product
<b>UV protection</b>	Without qualification, the Duralok brand will not fade, become brittle or be effected by the harsh Australian sun	<b>UV protection</b>	Without qualification, the Duralok brand will not fade, become brittle or be effected by the harsh Australian sun
<b>Position Memory</b>	If only we had the memory of the Duralok brand of PVC! When impacted in any form, the design allows the product to return to the original position	<b>Memory</b>	When impacted, the design allows the fence to return to its original position
<b>Capacity to with stand heavy winds</b>	Wind will cause the fence to bend thus preventing the fence being forced out of the ground or break	<b>Strong</b>	Can withstand the pressure of a (say) 500+ kg horse

<b>Revolutionary Privacy Fence Design</b>		<b>Rural Post and Rail Fence</b>	
Feature	What it provides	Feature	What it provides
<b>Soil Erosion</b>	The rail is able to be placed on the ground or even below the ground thus providing some degree of soil erosion between properties	<b>Flexible</b>	Animal hits the fence and the fence flexes – the animal is safe
<b>Pet friendly</b>	The rail can be placed directly or below the ground level thus preventing small pets sliding under the fence	<b>Installation</b>	Light and quick to install
<b>Will not rust</b>	Water, soil, salt spray etc., simply will not rust	<b>Maintenance Free</b>	No termites, no painting, minimal if no nil repairing
<b>Reduces weed growth to adjoining properties</b>	There is no place for soil to accumulate in the rail thus weed roots cannot take hold in the rail		
<b>Acoustic qualities</b>	The Duralok panels are not solid material – these panels are ribbed with air space between each side of the panel this providing the best of sound barriers in any like product anywhere in terms of the residential fencing		
<b>Sealed Systems</b>	The design is as such that the sealing during erection insures a barrier preventing little nasties treating the fence is their special home		
<b>Heat levelling</b>	Not hot in summer so as to not burn plants or other objects in contact with the fence		
<b>Maintenance Fee</b>	Virtually self maintaining.		

## **Applications are numerous as a replacement for steel, timber etc**
